Eng Sheng Products Pte Ltd registered company name was originally Eng Electric (Singapore) Pte Ltd. It is company established in November 1996 as a main distributor for Taiwan company Eng Electric Co. Ltd in South East Asia. Other functions include marketing and sourcing for new partnerships and products. We specialist in electrical products such as Switch Mode power supplies, AC-DC adapters, Power Transformers etc . Products made in China by Taiwan Company.

In July 2011, the company changed the name to ENG SHENG Products Pte Ltd as part of the plan to expand its range of products, sales and services, so as to attract more high potential companies to collaborate with. Currently, our customers have expanded beyond South East Asia to other regions of the world such as Europe, USA , Japan and China . Our service desk provides quick response to the queries and needs of our regional customers and this is one of the key factors for many companies to continue their collaborations with us.

The company has more than 30 years of experience in electrical product design, management of direct export from factory line as well as constant review and improvement in terms of quality control standards and cost analysis. We have the expertise and knowledge of the requirements for International Safety Standards and there is constant innovation and review of our product design.

On top of quality electrical products and attractive pricing, we aim to provide excellent customer service and commitment to ensure that the needs of our customers are met with prompt delivery of products and take into consideration, the feedback from our customers. This is further supported by training and development of our staff in the production line to improve work productivity and quality control management.

Eng Sheng Products Pte Ltd constantly seeks to provide continual and relevant training to ensure our staff remains updated with current and new knowledge and expertise in line with international trends and innovations.
